ROTATE 'EM!

CHOO YING LIN

TANJONG KATONG SECONDARY SCHOOL

AIM / OBJECTIVE

"Rotate 'em!" allows push-cart vendors to display their items on sale in a shorter period of time and in an easier way.

WHY THE NEED?

Observations and surveys show that most push-cart vendors take more than half an hour to set up or close their stalls. This is so as they use additional stands and racks to display small items like accessories. Most of the time, they have to hang them up one at a time, which is troublesome and time-consuming. Rotate 'em! replaces the additional stands and racks. It provides both display and storage functionalities. Hence, it allows vendors to set up and close the stall in a shorter period of time. All they have to do is to rotate the shelves and rods out to display or keep the items. Items can be kept in the cylindrical shelf.

HOW DOES IT WORK?

1. Clamp support onto tabletop / platform. Attach shelf to support.
2. Remove main rod and rotate the shelves out. Position shelves according to one's wish.
3. Rotate rods out to display the items clearly.
